**Personal Note:** I started doing this later in life, 10-15 years ago it was all I could do to get up on stage and sing and now, it's hard to get me down. The only regret I have is not doing this a long time ago, some may be thankful for that.

## What Can You Expect To See

Is He Buddy, Elvis, Some Say Charlie,  
Only His Wife Knows For Sure

A singer/songwriter living and performing in the Greater Toronto Area. When playing live the musical influences are obvious, Rockabilly, Country and good ole "Rock n Roll". As an avid Buddy Holly fan and having a great appreciation for music of the 50's & 60's, one might think this would sway his personal writing style. However Ken's own music has more of a Pop/Country feel. You can catch him performing with his band Reminiscing, solo or sitting in with friends. Whatever the occasion, it will be entertaining.
